# INTRODUCTORY.

## Merchant Tailors and Cutters.

### *THE CUTTER'S BOOK FOR TRYING ON NOTATIONS*

Is designed especially for keeping a correct and handy reference to notations of alterations, to original measurements when trying on the Garment.

I have given on one plate five styles of Coats combined, thus avoiding the necessity of referring to two or three pages for changes in as many Coats for each customer.

When alterations to a Garment are necessary, turn to a page. write the name of the customer and note the lessening, widening or narrowing, at any point of Coat by drawing lines and figures at the point to be altered, then index the name, in the printed index, corresponding to the page number.

Should it be necessary to re-produce a Garment, first find the original pattern, then refer to the correction book, when you can proceed intelligently.

Yours,

ROMAN L. BISKUP,

716 Olive Street, St. Louis, Mo.
